Audit Mobile

Operational Sustainability, LLC® (OS) offers the OESuite™ Audit Mobile Module as part of our overall mobility platform to streamline the auditing of any business process at the point of work, using tablets and/or mobile phones. Audit Mobile was built to be intuitive and user-friendly, requiring only simple training to implement. Once trained users begin working with the tool, they quickly become expert users and are able to independently complete entries and add content. Control protocols can be enabled that trigger requests for additional input or information based on user answers to simple questions, ensuring that important information isn’t overlooked or neglected in the process.

Field staff can take pictures with their tablet or phone and tie collected images to questions and responses, add comments in text fields, or link documents or other files. Once entries are completed, users can save the audit information for review for any non-conformances.

Audit Mobile offers both offline and online modes, enabling users to evaluate information and complete work where and how they need to. Audit findings and recommendations can be tracked in our Corrective and Preventative Action (CAPA) Module to closure.

Extended OESuite™ Modules

Mobilizing Your Workforce

With the OESuite™ Mobility platform, it’s easy to customize your own screens and workflows within our flexible framework to:

- Create email notifications and custom checklists
- Define mandatory or optional fields, text, and drop down field types
- Enable field value descriptions
- Add, remove, or re-sequence data fields and create workflows
- Supports bar coding / RFID
- Create your own security hierarchy
- Take pictures, annotate drawings
- Leverage GPS
- Enables data logging

We connect your workforce to asset, compliance, engineering, operations, automation, supply chain, and EH&S information where and when it’s needed. Applications include:

- Operator rounds
- Work management
- Inspection management
- Task / action item management
- Work instructions
- Condition assessment
- Work permitting
- Pre-Startup Safety Review (PSSR)
- Management of Change (MOC)
- Incident management
- Audit management
- Waste management
- Training
- Redlining
