

SDS Mobile

Operational Sustainability, LLC® (OS) offers the **OESuite™ SDS Mobile Module** as part of our overall mobility platform to streamline the Management of Safety Data Sheets (SDS) at the point of work, using tablets and/or mobile phones. **SDS Mobile** was built to be intuitive and user-friendly, requiring only simple training to implement. Once trained users begin working with the tool, they quickly become expert users and are able to independently search for SDS information. Field personnel can quickly access information on hazards, search for key words, assess appropriate PPE, and reduce risk, ensuring that important information isn't overlooked or neglected in the process.

Field staff can take pictures with their tablet or phone and tie collected images to questions and responses, add comments in text fields, or link documents or other files. Once entries are completed, users can save the audit information for review for any non-conformances.

SDS Mobile offers both offline and online modes, enabling users to access and evaluate information where and how they need to. Users can access all 16 sections of the SDS in accordance with the new Globally Harmonized System of Classifications and Labelling of Chemicals (GHS). This includes new provisions to communicate the hazards of chemical products.

Mobilizing Your Workforce

With the **OESuite™ Mobility platform**, it's easy to customize your own screens and workflows within our flexible framework to:

- Create email notifications and custom checklists
- Define mandatory or optional fields, text, and drop down field types
- Enable field value descriptions
- Add, remove, or re-sequence data fields and create workflows
- Supports bar coding / RFID
- Create your own security hierarchy
- Take pictures, annotate drawings
- Leverage GPS
- Enables data logging

We connect your workforce to asset, compliance, engineering, operations, automation, supply chain, and EH&S information where and when its needed. Applications include:

- Operator rounds
- Work management
- Inspection management
- Task / action item management
- Work instructions
- Condition assessment
- Work permitting
- Pre-Startup Safety Review (PSSR)
- Management of Change (MOC)
- Incident management
- Audit management
- Waste management
- Training
- Redlining

OESuite™ digital forms work across various devices
